Product Manager and hands-on AI agent builder with a backend engineering background. Builds and deploys agent workflows for software, website and security testing, combining technical delivery with data analytics and product leadership.

EXPERIENCE

ModelsLab | Product Manager

Jan 2023 - Present | Mumbai, India

- Built and orchestrated AI agents for software, website and security testing and managed workflow deployment and execution.
- Developing Redcell, an AI cybersecurity agent, and using LLM-as-a-judge to evaluate its responses.
- Built marketing agents and shipped image-generation and video-generation products.
- Used Google Analytics, A/B testing and customer feedback to guide product improvements.
- Coordinated ML, backend and frontend teams through Jira and Agile practices, prioritizing work and tracking delivery against tight deadlines.
- Managed competing priorities in a fast-paced AI environment with 24-hour launch targets for new features and products.
